

Normalization

- Character normalization means that more documents are retrieved even if the documents do not exactly match the query's characters' writing method.
- Not unique to Chinese characters.
- Example in English:
 - ☞ Compliance=compliance=COMPLIANCE=cOmPliANce
 - ☞ color=colour, organization=organisation
 - ☞ China=china=CHINA
- Example in Chinese:
 - ☞ 盧 = 卢

Normalization in Chinese Names

6 Possible Combination of Chinese characters for a name

Normalization lets you enter any one of these 6 combinations

Different characters for the same word in a name (even in same character set):

TR - Chinese Name
蕭柏群

Combinations
蕭柏群
蕭栢群
蕭栢群
